

Hasnat Rafi Uddin

01863099966 — hasnatrafiuddinmunif@gmail.com

Bangladesh — Open to Remote

linkedin — github — portfolio — leetcode

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Software & Data: Data processing basics, data validation, debugging, scripting, REST API integration

Web & Tools: HTML5, CSS3, React, Git, GitHub, REST APIs, MongoDB (basic), Postman (basic)

Machine Learning: PyTorch, TensorFlow, YOLOv8, MediaPipe, OpenCV, CUDA

Concepts: Data consistency, system reliability, model evaluation, error analysis

EDUCATION

B.Sc. in Computer Science

2021 – 2025

BRAC University

Bangladesh

Higher Secondary Certificate (HSC)

2020

BCIC College

Bangladesh

Secondary School Certificate (SSC)

2018

Noakhali Zilla School

Bangladesh

PROJECTS

Movie Mania — *React, Vite, TMDB API* — GitHub

- Built and validated an API driven web application with search, filtering, and state persistence. Verified data correctness, handled API failures, and ensured UI state consistency.

GitHub User Finder — *JavaScript, GitHub REST API* — GitHub

- Integrated and tested REST APIs to fetch and display user and repository data. Validated responses, handled edge cases, and ensured reliable data flow across the application.

Kanban Board — *JavaScript, HTML5, CSS3* — GitHub

- Developed task management logic with drag and drop workflows and persistent storage. Debugged state transitions, ensured data persistence, and validated user interactions.

Helmet & License Plate Detection — *Python, PyTorch, YOLOv8* — GitHub

- Built and evaluated a computer vision pipeline, analyzing model outputs, false detections, and robustness across varied real-world data conditions.

UNDERGRADUATE THESIS

Mitigating Domain Shift in Skin Cancer Recognition with Dropout Consistent Federated Averaging

- Reproduced three state of the art skin lesion classification models.
- Designed an EfficientNet based architecture with SE attention.
- Converted centralized training pipelines to federated learning.
- Identified and resolved dropout induced zero dilution in FedAvg.
- Implemented mask-aware aggregation to improve robustness.
