PROFESSIONAL SUMMARY

Full Stack Developer experienced in building production-ready web applications using React, Next.js, Node.js, and MongoDB. Skilled in REST API development, JWT authentication, real-time systems, and cloud integrations such as Cloudinary and Stripe. Computer Science graduate with research experience in federated learning, deep learning, and computer vision using frameworks like TensorFlow and PyTorch. Seeking full-time or remote software engineering roles.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Design, JWT Authentication

Databases: MongoDB, Mongoose

Machine Learning: TensorFlow, PyTorch, Deep Learning, Computer Vision, Federated Learning

Tools: Git, GitHub, Vite, Postman, Cloudinary, Stripe, Vercel, Render

EDUCATION

BRAC University B.Sc. in Computer Science	Bangladesh 2021 – 2025
BCIC College Higher Secondary Certificate (HSC)	Bangladesh 2020
Noakhali Zilla School Secondary School Certificate (SSC)	Bangladesh 2018

PROJECTS

ShopHub | Next.js, React, MongoDB, Stripe, Tailwind | GitHub

- Built full-stack e-commerce platform with JWT authentication, shopping cart, wishlist, and order management.
- Developed admin CMS dashboard supporting product CRUD, user management, order tracking, and Cloudinary image uploads.
- Integrated Stripe payments and deployed production build on Vercel.

Savour & Stone | React, Node.js, Express, MongoDB | GitHub

- Built restaurant platform supporting menu browsing, pickup orders, reservations, and reviews.
- Implemented JWT authentication, RBAC (customer/admin), and REST APIs with MongoDB.
- Deployed frontend on Vercel and backend on Render using decoupled architecture.

Movie Mania | React, Vite, TMDB API | GitHub

- Developed responsive React SPA with live search, genre filtering, trending and top-rated movie views.
- Implemented favorites system using localStorage and secure API key management.

QuickChat | React, Tailwind, ZEGOCLOUD ZIM SDK | GitHub

- Built real-time one-to-one chat application supporting live messaging, emoji reactions, and sound notifications.
- Designed modular React components and implemented real-time state synchronization.

UNDERGRADUATE THESIS

Mitigating Domain Shift in Skin Cancer Recognition with Dropout-Consistent Federated Averaging

- Reproduced three SOTA skin lesion classification models as centralized baselines.
- Designed EfficientNet-based architecture with SE attention for improved feature extraction.
- Converted centralized pipeline into federated learning with FedAvg aggregation.
- Identified dropout-induced zero-weight dilution and implemented mask-aware aggregation to improve robustness.
